

## San Diego and Imperial County Community Colleges Open Spring Enrollment for Career Education Classes

*Hands-on education and training programs for region's most in-demand careers now accepting new students*

**SAN DIEGO, CA (December 2, 2019)**—Spring enrollment is now open at all ten of the San Diego/Imperial Valley region's community colleges and Continuing Education centers. Career Education programs, many of which prepare students in two years or less for the growing number of competitive middle-skill jobs in California, are accepting new students at every campus.

"It's a new year, and now is the time to take steps toward a new career," said Dr. Martha Garcia, superintendent and president of Imperial Valley College. "Our colleges have hundreds of affordable programs that help prepare students for careers in booming fields, such as computer science, health science and cybersecurity.

### Better Jobs, No Debt Required

Middle-skills jobs, which require more education than a high school diploma but less than a four-year degree, are the fastest-growing job category in both [San Diego](#) and [Imperial Counties](#). Employment in these jobs, which include roles like medical laboratory technician and web developer, earn [well above the area's median wage](#).

San Diego and Imperial County Community Colleges Career Education programs are an affordable, efficient path to a rewarding, high-paying career. Credit courses cost just \$46 per credit, compared to the average of [\\$594](#) for a four-year college course—plus, at many of the colleges, fees are waived for the first two years for first-time, full-time students, and noncredit continuing education classes are free. The average four-year college student leaves school today with an estimated [\\$37,000 in debt](#), and many students continue to struggle making payments well after graduation. By contrast, Career Education programs provide complete career training for as little as \$3,000, and 71 percent of students are employed within a year of graduation.

"Today's education options are as diverse as our student population and workforce," said Dr. Garcia. "College affordability has become a major topic of conversation, and many are recognizing that four-year degrees are no longer the only route to a rewarding career. Our programs are challenging, affordable and provide hands-on job experience students can't receive anywhere else. We're seeing that employers are increasingly
